Supplementary Material

Furanoterpenic fatty acid esters from the Australian marine sponge
Coscinoderma mathewsi

Ken W. L. Yong, a John N.A. Hooper, b and Mary J. Garson* a

a School of Molecular and Microbial Sciences, The University of Queensland, Brisbane QLD 4072, Australia
b Queensland Museum, PO Box 3300, South Brisbane QLD 4100, Australia

Dedicated to Professor Torbjorn Norin

Contents

1. Figure S1. 1H NMR spectrum for furan fatty esters 1a – 1c S2
2. Figure S2. GC-MS data for FAMES 5a – 5c derived from esters 1a – 1c S3
3. Figure S3. A surface photograph of a specimen of Coscinoderma mathewsi S4
Figure S1. $^1$H NMR spectrum for furan fatty esters 1a-1c.
Figure S2. GC-MS data for FAMES 5a-5c derived from esters 1a-1c.
Figure S3. A surface photograph of a specimen of *Coscinoderma mathewsi*.
