Table of Contents

1. NMR analysis of morpholinomethanol (HA) and dimorpholinomethane (BA) S2
2. NMR analysis of Reaction mixtures of HA, BA, PPA, and PA S4
3. $^1$H NMR data of the reaction mixture with PPA, paraformaldehyde and morpholine in CD$_3$CN S6
Figure S1-1. $^1$H-1H COSY of morpholinomethanol (HA) and dimorpholinomethane (BA)

Figure S1-2. $^1$H-$^{13}$C HSQC of morpholinomethanol (HA) and dimorpholinomethane (BA)
Figure S1-3. $^1$H-$^{13}$C HMBC of morpholinomethanol (HA) and dimorpholinomethane (BA)
Figure S2-1. $^1$H-$^1$H COSY of Reaction mixtures of HA, BA, PPA, and PA.

Figure S2-2. $^1$H-$^{13}$C HSQC of Reaction mixtures of HA, BA, PPA, and PA.
Figure S2-3. $^1$H-$^{13}$C HMBC of Reaction mixtures of HA, BA, PPA, and PA.
Figure S3. $^1$H NMR data of the reaction mixture with PPA, paraformaldehyde and morpholine in CD$_3$CN.
