Debromination on a double bond containing substrate

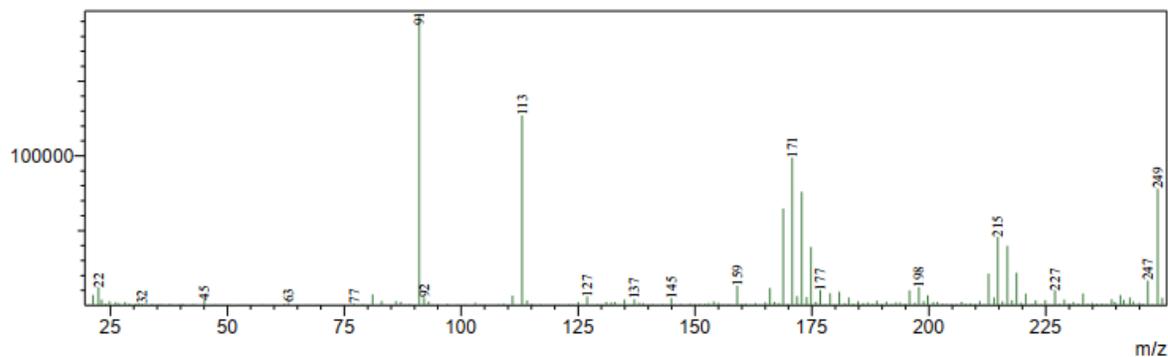

PHMS debrominated the bromine group selectively without interfering with the double bond. The debromination was confirmed by running the crude products on a single quadrupole LCMS 2020.

If double bond is reduced, then the mass will be 120, there is no peak here.

Exact Mass: 120.09

If double bond is reduced before debromination, then the mass will be 198 and a double peak will appear but there is no such peak in the whole spectra

Exact Mass: 198.00
